Yash Tangadi

yashtangadi1999@gmail.com | +91 99875 51141 | Mumbai, India | LinkedIn

Senior Java Backend Engineer with nearly 5 years of experience designing high-throughput, event-driven systems for regulated insurance and banking. Expertise in **Java 8/17/21, Spring Boot, Apache Kafka, RESTful APIs, microservices, system design, multithreading, SQL, and Linux**. Delivered platforms processing **2 million+ transactions/day** and **15,000+ documents/day**; reduced insurance onboarding turnaround time by **83%**.

TECHNICAL SKILLS

- **Backend:** Core Java 8/17/21, Spring Boot, RESTful APIs, Microservices, Multithreading & Concurrency, Event-Driven Architecture, Distributed Systems, System Design
- **Messaging & Integration:** Apache Kafka, Asynchronous Processing, XML, Third-Party API Integration, UIDAI Aadhaar eKYC, NSDL PAN Verification, Demographic Authentication, Penny-Drop Verification
- **Data & Persistence:** SQL, Oracle Database 19c, Microsoft SQL Server, PostgreSQL, MySQL, MongoDB, Hibernate/JPA, ORM Performance Tuning
- **Platforms & Tools:** Linux, Shell Scripting, Apache Airflow, Git, Maven, Agile/Scrum, AI-Assisted Development
- **DevOps Foundations:** CI/CD Pipelines, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

Deputy Manager - Technical Delivery **Feb 2025 - Present**
PNB MetLife* | *Java Backend Engineering ***Mumbai, India***

- Lead backend architecture and delivery for **eBranch NXT v2 (E BranchPro)**, a pan-India insurance onboarding and policy-issuance platform handling **5,000+ proposals/day**.
- Re-architected the end-to-end onboarding workflow, cutting turnaround time from **90 minutes to 10 minutes (83%)**; delivered the change in six months with **zero critical production incidents after go-live**.
- Designed and owned the **SWIFT Integrator**, generating XML payloads across **29+ insurance products** for integrations with Munich Re and LifeAsia.
- Architected **Kafka-based asynchronous document orchestration** for 15+ compliance documents per journey and **15,000+ documents/day**; bootstrapped the Linux cluster and configured partitions, consumer groups, and offset management.
- Integrated API-based KYC controls including UIDAI Aadhaar eKYC, NSDL PAN verification, demographic authentication, and penny-drop verification.

Environment: Java 17/21, Spring Boot, Apache Kafka, Microservices, REST APIs, Microsoft SQL Server, Linux, XML

Technical Specialist **Sep 2024 - Jan 2025**
Translab.io* | *Java Backend Engineering ***Mumbai, India***

- Engineered a high-throughput Java, Spring Boot, and Hibernate migration platform for complex data transfers across **PostgreSQL, MySQL, Oracle Database, and Microsoft SQL Server**.
- Increased migration throughput by **30%** and automated fault-tolerant migration workflows using **Apache Airflow DAGs**.

Environment: Java, Spring Boot, Hibernate/JPA, Apache Airflow, Microservices, REST APIs, PostgreSQL, MySQL, Oracle Database, Microsoft SQL Server

System Engineer **Dec 2021 - Sep 2024**
Tata Consultancy Services* | *Java Backend Development ***Navi Mumbai, India***

- Owned backend services for the **SBI tax-filing platform**, processing **2 million+ transactions/day** across **30+ SBI applications**.
- Supported **INR 50 crore+ in monthly tax remittances** at **98% processing accuracy** while meeting regulatory requirements.
- Automated ETL operations with shell scripts, reducing manual effort by **40%** and increasing processing throughput by **25%**; persisted records in Oracle Database 19c.
- Built a multithreaded Java invoice engine that generated and emailed **200,000+ invoices/month**.
- Tuned Hibernate ORM using lazy loading, N+1 query elimination, and the Criteria API for high-volume workloads.

Environment: Java, Spring Boot, Hibernate/JPA, Oracle Database 19c, REST APIs, Shell Scripting, Linux, Maven, Git, Agile/Scrum

EDUCATION

Bachelor of Engineering - Electronics & Telecommunication **2017 - 2021**
Shivajirao S. Jondhale College of Engineering ***Mumbai, India***
